Education

Bachelor of Science in Data Science

FAST National University of Computer and Emerging Sciences (NUCES)

Aug 2021 – May 2025

Lahore, Pakistan

ICS

Government College University (GCU)

Aug 2019 – Mar 2021

Lahore, Pakistan

Matriculation

Beacon House School System (BSS)

Lahore, Pakistan

Experience

Software Engineer | Techlogix

Apr 2026 – Present

- Developing and maintaining full-stack web applications for enterprise clients using modern technologies.
- Collaborating in Agile teams on feature development, testing, and deployment.
- Contributing to system architecture discussions and code reviews.

AI-Based Learning Web Application Developer | Online Academy

Jan 2026 – Feb 2026

- Developed an AI-powered online learning platform with interactive courses, quizzes, and personalized AI learning assistants.
- Worked in a team of 6 for automation of AI agents and collaboration with teachers for courses lectures and outlines for helping students learn better.
- Ensured a responsive, user-friendly interface using modern web technologies and optimized user experience.
- Collaborated with a team of 6, participating in regular meetings and coordinating development tasks.

DevOps Intern | Systems Limited

Sep 2025 – Nov 2025

- Worked with Microsoft Azure services including VMs, resource management, and deployments.
- Participated in Agile stand-ups, sprint meetings, and technical discussions.
- Documented deployment and troubleshooting procedures.

Software Development Intern | Techverx

Jun 2024 – Aug 2024

- Assisted in feature development, testing, and debugging while following clean code practices.
- Collaborated with senior developers to understand architecture and Agile workflows.

Projects

AI-Powered Clinical Intelligence OS (CIOS) | Full-Stack + DevOps

2026

- Built a hospital management system with real-time vitals monitoring (3s polling), AI-driven clinical insights, and patient status management across 9 Dockerized microservices.
- Implemented patient status lifecycle (Active/ICU/Emergency/Discharged) with auto-generated discharge reports and automated ICU database sync.
- Set up Docker Compose orchestration with PostgreSQL, Redis, FastAPI backend, React frontend, and Nginx gateway for the CIOS platform.
- Developed an independent ICU Monitoring System with real-time WebSocket streaming, ML-based risk prediction, and a separate React dashboard.

Deep Fake Audio Detection (FYP)

Sep 2024 – Jun 2025

- Developed ML models to detect AI-generated Urdu voice scams using BERT-based architectures.
- Designed a web interface for users to upload audio files and receive real-time predictions.
- Performed model evaluation and optimization to maximize detection accuracy.

YouTube Summarizer | FAST-NU

Apr 2024 – May 2024

- Designed and developed an AI-powered system that accepts YouTube video URLs and generates concise, context-aware summaries within seconds.
- Integrated multilingual translation support, enabling users to convert summaries into their preferred language for improved accessibility.

- Leveraged NLP techniques to ensure accurate content extraction and meaningful summarization.

FAST Care — Blood Donation Management System

Feb 2023 – Jun 2023

- Built a full-stack web app using Flask, MySQL, Bootstrap, and JavaScript.
- Automated donor matching and request tracking system, reducing response time.
- Developed modules for volunteer management and donation campaigns.
- Collaborated in a team of 5, following agile practices for timely delivery.

Technical Skills

Programming: Python, C/C++, SQL, Assembly, HTML, CSS

Frameworks & Tools: Flask, Bootstrap, REST APIs, BERT (Transformers), PySpark, Hadoop, MapReduce, FastAPI, React, Docker, Docker Compose, PostgreSQL, Redis

Databases: MySQL, PostgreSQL

Cloud & DevOps: Microsoft Azure (Fundamentals), Docker

Developer Tools: PyCharm, VS Code
